Помеченные К.О. и экспоненциальные производящие функции

ao a,
$$a_1 \cdots a_n - A(t) = a_0 + a_1 t + a_2 t^2 + \cdots + a_n t^n + \cdots$$

$$\begin{cases}
1 & \text{operator} \\
1 & \text{operat$$

Это все для того, чтобы можно было записать производящую функцию для некоторых других последовательностей

a, a, a, ... a, ..

$$\frac{\partial n}{\partial t} = \frac{a_0}{a_0} + \frac{a_1}{1!} t + \frac{a_2}{2!} t^2 + \dots + \frac{a_n}{n!} t^n + \dots \\
